

Water Desalination: Water Cycle Remix Worksheet

1. For each term (on the left), write a number of the description (on the right) that best fits.

Water Cycle Step	#	Description
evaporation _____	1	Water falls back to the Earth.
collection _____	2	Water vapor transforms back into liquid form.
condensation _____	3	Water from rivers, lakes and oceans transforms from liquid to water vapor.
precipitation _____	4	Water flows from land to rivers, lakes and the ocean.

2. Label the bubbles with the step of the water cycle that best completes the loop.
Connect each bubble with an arrow, showing the correct order in the water cycle.
