

## The Heart Post-Test

1. Starting with the superior and inferior vena cava, correctly identify the path of blood flow through the heart, ending with the aorta.
2. Which valve separates the left atrium from the left ventricle?
3. Which valve separates the right atrium from the right ventricle?
4. Where is the aortic valve located?
5. Which vessel carries oxygenated blood away from the heart?
6. Which vessel carries deoxygenated blood away from the heart?
7. What is the function of the valves in the heart?
8. Which type of chamber is responsible for pushing blood out of the heart: atria or ventricles?
