

## Four Types of Dams

For each type of dam below, do the following:

1. Label each dam type with the name by which it is commonly known.
2. Draw waves (  ) to indicate on which side of the dam the reservoir (water) will be.
3. Draw an arrow labeled “W” in the direction that the water exerts a force.
4. Draw an arrow labeled “D” in the direction that the dam exerts a force.

Which dam do you think should be used for Thirsty County? Why?
