

Solving with Seesaws – Post-Assessment

1. Which term is a constant term in this equation? Circle it in the equation.

$$4b + 9 = b$$

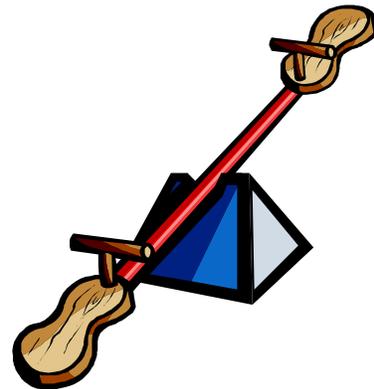

2. Which term is a variable term in this equation? Circle it in the equation.

$$6 + 9c = 87$$

3. Circle the equation below that allows you to solve for the variable in two steps. Then solve for the variable.

(a) $9a + 4 = 9a - 4$ (b) $4b + 2 = 4b + 4$

(c) $6n + 6 = d - 9$ (d) $3t + 5 = 2t - 9$

4. Solve the equation below for n:

$$3n + 1 = n + 21$$

5. What did you like or dislike about the lesson?

6. What did you like or dislike about the robotic device?

7. How did you like this lesson?

- (a) Strongly disliked (b) Disliked
- (c) Liked (d) Strongly liked

8. Do you think using robotics to collect data (Circle One):

- (a) Made the lesson easier
- (b) Made the lesson harder
- (c) Made no difference in the lesson
