

Name That Metal!

Metals

- copper
- aluminum
- zinc
- iron
- brass

History of Copper

Copper

- Earliest known discovery: in 9000 BC in the Middle East
- Italians used copper lumps as money in the 6th-3rd centuries BC
- Copper wire was used as an insulator in the early 1800s
- *Historical uses:* money, coins, wire, copper tubing in ancient Egypt, thin copper sheets for canvas paintings, coins

History of Aluminum

Aluminum

- Obtained name from Latin for alum, alumen
- Earliest traces found around 5300 BC, however not “discovered” until 1800s by Sir Humphrey Davy
- *Historical uses:* fabric dyes, cosmetics

History of Zinc

Zinc

- Earliest traces in 20 BC–14 AD by the Romans
- Recognized as a separate metal in 16th century
- US production began in 1850
- *Historical uses:* healing wounds, sore eyes

History of Iron

Iron

- Known and used since pre-historic times—more than 7,000 years ago
- Hittites in West Asia were among the first to use it
- After the Dark Ages, Mediterranean people used it
- *Historical uses:* kitchen utensils, jewelry, weapons (knives, arrowheads, spears)
- From 1000 BC to present day, ***iron is the most-used metal***

History of Brass

Brass

- Copper-zinc alloys produced in the early fifth millennium BC in China
- Widely used in east and central Asia by second and third century BC
- Romans discovered how to produce brass
- *Historical uses:* coins, jewelry, golden helmets, vessels and bowls

Basic Properties

Metal	Density	Melting Point	Ferromagnetic?
copper (Cu)	$8.96 \text{ g}\cdot\text{cm}^{-3}$	1084.62°C 1984.32°F	No
aluminum (Al)	$2.70 \text{ g}\cdot\text{cm}^{-3}$	660.32°C 1220.58°F	No
zinc (Zn)	$7.14 \text{ g}\cdot\text{cm}^{-3}$	419.53°C 787.15°F	No
iron (Fe)	$7.874 \text{ g}\cdot\text{cm}^{-3}$	1538°C 2800°F	Yes
brass	$8.73 \text{ g}\cdot\text{cm}^{-3}$	940°C 1724°F	No

Uses

Metal	Uses	
copper (Cu)	Electrical wiring, pipes, building construction, radiators, brakes, gutters, roofs, electric motors	
aluminum (Al)	Packaging (cans, foils, bottle tops), airplanes, cars (wheels, impellers, hoods, mirrors), construction (casting, pipes, skylights, rods, ladders)	
zinc (Zn)	Batteries, paint, rubber, toothpaste, automotive parts, electrical and hardware industries, window and door frames	
iron (Fe)	Machinery, buildings, railings, tools (tie-rods, bolts, straps), bridges, kitchen appliances, automobile parts, ship frames	
brass	Zippers, locks, bearings, gears, mirrors, musical instruments, fixtures, art, plumbing, cable connectors and fittings
