### How Do Things Fall? Worksheet

Use this table to record your predictions and the results for this activity. List the objects in a pair in the first and second columns. In the third column, write which object you think will hit the ground first when you drop them. If you think they will hit the ground at the same time, write "same time." In the fourth column, explain why you think that object will hit the ground first. In the last column, record the results of dropping the two objects together. If one object hit the ground first, write the name of that object in the Results column. If they hit the floor at the same time, write "same time."

Object 1	Object 2	Your Prediction: Which will hit the ground first?	Why?	Results
