## Drifting Continents - Math Extension Worksheet

With your calculator, calculate the distance, given the speed and time:
Use the following formulas to find out how far these continents will travel in 100 years:

## Speed x Time = Distance $1 \mathrm{~cm}=.394$ in

| Continent | Speed | Time | Distance <br> (cm) | Distance <br> (in) | Time | Distance <br> (cm) | Distance <br> (in) |
| :---: | :---: | :---: | :---: | :---: | :---: | :---: | :---: |
| Antarctic | $2 \frac{\mathrm{~cm}}{\text { year }}$ | 1 year |  |  | 100 years |  |  |
| African | $2.2 \frac{\mathrm{~cm}}{\text { year }}$ | 1 year |  |  |  |  |  |
| South <br> American | $1.5 \frac{\mathrm{~cm}}{\text { year }}$ | 1 year |  |  | 100 years |  |  |
| North <br> American | $1.2 \frac{\mathrm{~cm}}{\text { year }}$ | 1 year |  |  | 100 years |  |  |

Which continent is moving the fastest? Where will it be in 100 years? $\qquad$
