

Viking Ship Anatomy Worksheet **Answers**

1. Use the following vocabulary words to label the components of the Viking ship below.

Rudder, sail, hull, mast, drag, stem, oars, keel, bow

2. Now, consider how the ship would sail if you removed its components, one at a time. For example:

Without the **SAIL**

The ship could not use the energy of the wind to propel itself.

Without the **RUDDER**

The ship could not sail across the water.

Without the **mast**

There would be no support for the sail.

Without the **drag**

The motion of the ship wouldn't be slowed by friction.

Without the **keel**

There would be less ballast to stabilize the ship.
