All About Energy Pre/Post Test Answers

Please circle the best answer for each of the following questions about energy.

1. What is energy?
   a. Energy is the motion of the planets around the sun.
   b. Energy is the ability to do work.
   c. Energy is what causes the four seasons.

2. Select the statement that is FALSE:
   a. Energy can give off light.
   b. Energy can produce heat.
   c. Energy can be created and destroyed.
   d. Energy causes movement.

3. True or False: Electricity is a type of energy.
   a. True
   b. False

4. Electricity is caused by the ________ of charged particles.
   a. movement
   b. attraction
   c. loss
   d. explosion

5. Choose the best definition for each of the following terms.
   a. Charge
   b. Current
   c. Voltage
   d. Resistance
   a. The flow of electricity
   b. Something that keeps electricity from moving
   c. Electrical energy of a particle
   d. The amount of electricity that is able to flow

6. Engineers use ________ to control the flow of electricity.
   a. electrons
   b. protons
   c. circuits
   d. current

7. Where does our electricity come from?
   a. Electricity floats in the air.
   b. Electricity is something we can buy at the store.
   c. Electricity comes from the wall.
   d. Electricity is made at power plants.
