Coding Challenge Rubric

	Does Not Meet Expectation (1 point)	Approaches Expectation (2 points)	Meets Expectation (3 points)	Exceeds Expectation (4 points)
Coding Challenge Elements	No or few required elements of challenge are included.	Most required elements of challenge are included.	All required elements of challenge are included.	All required elements of challenge are included. Program contains additional elements to improve, enhance, or extend functionality.
Functionality	If included, required elements do not function as expected.	Required elements work mostly as expected. Students may need to refine some elements.	All required elements of challenge work as expected.	All required elements of challenge work as expected. Some elements have been revised to perform more efficiently.
End of Program	Program has no specified end.	Program has a specified end that is unclear or poorly defined.	Program has specified end. Program resets to initial state when program is restarted.	Program has specified end. Program resets to initial state when program is restarted.
Mission Accomplished	The mission cannot be completed in the present parameters.	The mission is rushed or unlikely to succeed as a result of unrealistic time or conditions.	The mission can be completed in a reasonable amount of time, but there is a very limited route to mission success.	The mission can be completed in a reasonable amount of time and there are multiple ways in which program can end successfully.
(Peer) Review	There is no review by peers.	Reviewed by one peer, at least one improvement made.	Reviewed by at least one peer. Multiple improvements made.	Reviewed by multiple peers or groups. Multiple improvements made, additional coding elements are introduced.

Commented [BM1]: These should not be the same, to avoid confusion on scoring.
