

# Runaway Train Ramp Build Instructions

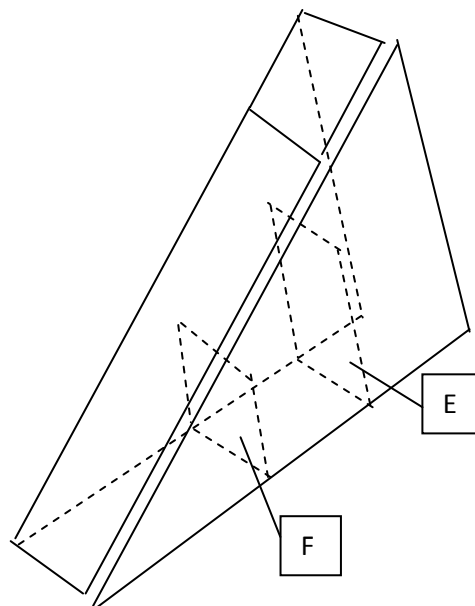

- 1. Cut the pieces out of foam core board according to the templates below. Cut on the solid lines.

2. Glue the top ramp to the two sides and hold in place temporarily with tape until dry.

3. Glue the two stiffeners inside the ramp structure as shown in the diagram below.

4. Glue the  $\frac{7}{8}$ " strip to the ramp surface. It will take two pieces to cover the 30" length of the ramp.
