

Name:

Date:

Class:

Alternative fuel: Natural Gas

Instructions: Read this webpage https://afdc.energy.gov/vehicles/natural_gas_emissions.html and then answer the questions below.

Natural Gas Vehicle Emissions:

What are the benefits of using natural gas vehicles?

Life Cycle Emissions and Petroleum Use:

What do CNG and LNG stand for?

What is the difference in emissions between CNG and LNG?

What is RNG?

Use the GREET excel database to complete the chart below:

1. Open this link: https://greet.es.anl.gov/greet_1_series
2. Click the link underneath "GREET 1 Series (Fuel-Cycle Model)" or this link [GREET_2020rev1.zip](#)
3. Open the GREET folder
4. Select "GREET1-2020"

Navigation tabs: Inputs, Results, Petroleum, Ethanol, Natural Gas, MeOH & FTD, RNG, Electric, Hydrogen, BioOil, Pyrolysis & IDL, Integrated Biorefinery, Fuel Production Time Series, Emission Factors Time Series, Agricultural and Mining Machineries Emission Factors Time Series, Water Consumption Factors, Passenger Car Time Series, Light Duty Truck 1 Time Series, Light Duty Truck 2 Time Series, Fuel Specifications, Vehicles, Ag Inputs.

Bottom navigation bar: Inputs, Results, Petroleum, NG, MeOH_FTD, EtOH, Electric, Hydrogen, BioOil, Algae, RNG, Pyrolysis_IDL, IBR, PTF, E_fuel, Fuel_Prod_TS

- To use the GREET database, you have to click on the tab at the bottom of the screen. Natural gas is abbreviated NG, so click the "NG" tab. The red arrow above is pointing to it.
- There is a lot of information on this database. Scroll all the way down to 4) Summary of Energy Consumption, Water Consumption, and Emissions. Record the data listed in table 4.1 for "Natural Gas as Stationary Fuels". This table tells you the energy use, water consumption, and total emissions for **what are the units? Each gallon of ethanol? (it says Btu or Grams per mmBtu of fuel)**
- Because we are interested in reducing carbon emissions and climate change, you will be looking at the values for methane (CH₄), carbon dioxide (CO₂), and nitrous oxide (N₂O). There are other variables in this chart, but we will focus just on these three. There is a red box around them in the table below.

Navigation: Overview | Inputs | Results | Petroleum | NG | MeOH_FTD | EtOH | Electric | Hydrogen | BioOil | Algae | RNG | Pyrolysis_IDL | IBR | Fil | [Red Arrow pointing to a red circle around a navigation button]

8. Record the amount of CO₂, N₂O, CH₄ in the emissions for the “Natural Gas as Stationary Fuels” in the table below. If you would like to move through the data table to see the other data that is collected, use the arrow that has the red circle around it in the picture above.

Natural Gas	
Type of emission	Total amount of emission
CH ₄	
N ₂ O	
CO ₂	

The abbreviations in GREET are defined below:

VOC = volatile organic compounds

CO = carbon monoxide

NO_x = nitric oxide

PM10 = particulate matter with a diameter of 10 micrometers or less

PM2.5 = particulate matter with a diameter of 2.3 micrometers or less

SO_x = sulfur oxides

BC = black carbon (particulate matter/ soot & contributes to climate change)

OC = organic carbon (respiratory effects)

CH₄ = methane

N₂O = nitrous oxide

CO₂ = carbon dioxide

Name:

Date:

Class:

9. In the table below, fill in the row for natural gas.
10. When everyone is finished learning about the energy sources, share what you have learned with the group. Each individual should summarize the questions they answered and share the GREET emissions that were calculated. Notes should be taken in the table below so that the information can be shared with your poster group.
11. Circle the energy source you will use to heat your building (remember that we are assuming that the technology for this will be in place) and complete the information below the table.

Energy Source	Information about energy source	GREET values
Ethanol		
Electric		
Biodiesel		
Natural Gas		
Propane		
Hydrogen		

Type of fuel that will be recommended for use in heating your building structure:

Evidence and reasoning for this recommendation:

12. Return to the “Energy Source” document and continue to step 2.
