The Water Around Us Exit Ticket

Fill in the box with the correct type of water source:

A large stream of water that runs into a lake, sea or another river.	
A large expanse of sea.	
A small body of moving water.	
A large body of water surrounded by land.	
A small body of still (non-moving) water.	

What kinds of water sources can we use for our drinking water?

What are the differences between salt water and fresh water?

Where can natural water and human-made water be found?

Why is water important for animals and plants?
