

Make It Clean! Engineering a Multipurpose Cleaning Product

A close-up photograph of a single water droplet hitting a calm, light blue surface, creating a series of concentric ripples that spread outwards. The background is a soft, uniform blue gradient.

Why is water so important?

Ways we pollute water

- Plastic
- Oil
- Chemicals from factories and homes

Chemicals polluting water

—

Can we find a
solution to help
solve this
problem?

The Challenge

Design a unique cleaning product that is:

- Environmentally friendly.
- An effective cleaner.
- Affordable.

Present your product

You will have three minutes to present your product.

- Brand name
- Cleaning properties
- Why it is environmentally friendly
- Cost
