Bio-DeHuskin Bags

By: Scicelady0209

Welcome, my name is Mrs. Mason and welcome to my classroom.

How many potato chip bags are polluting our environment?

My kids love potato chips, but we didn’t know the bags were made of plastic.

Yes, and it is a global issue that is negatively impacting our environment.

Potato chip bags are not degrading and the bags are ending up in our oceans.

The plastic pollutants are toxic and harmful to animals and the environment.

We need to do something to save our oceans. We need to live plastic free.
