## Pre-Activity Discussion Questions

- 1) What gives power to your cell phone?
- 2) What happens when you 'discharge' a battery?
- 3) How are batteries used today?
- 4) Are there different kinds of batteries? If so, give some examples.
- 5) What do you think are the differences between these types of batteries?
- 6) What are the differences between AA, AAA, etc. types of cells as shown in Figure 1?

Figure 1: Batteries of various styles and voltage.
