

Name: _____ Date: _____ Class: _____

Electrical Careers Research Project

Welcome to the future! You are about to graduate high school and you want to know more about different professions in electricity and/or involving knowledge of electrical systems. Choose one of the careers from the list below and prepare a paragraph to present to the class.

Make sure your presentation includes:

- The name of the career
- How people in that career work with electricity
- What they do on a normal day
- What type of training or education they need to do their jobs

Use resources in the classroom, library and Internet to find the information you need.

- Make a bibliography of your information sources.

Electrical Careers

- electrical building inspectors
- electrical drafters
- electrical engineers
- electronics engineers
- electricians
- motor repair
- solar panel
 - installers
 - designers
 - engineers
- wind turbine
 - installers
 - designers
 - engineers
 - operators
- process engineers
- chemical engineers
- mechanical engineers
- aerospace engineers
- power plant employees

Ask your teacher if you want to research a career not on this list.
