

Extra Independent Assignments

Below are ideas of things that students can work on individually to ensure that all students are working at all times. You could easily keep track by creating a chart on a poster board to hang in the room with the assignments at the top and names on the side. As each student turns in each assignment, they can put a mark or sticker in the corresponding box.

Assignments:

- Watching PBS's Making Stuff Stronger (online) https://www.youtube.com/watch?v=aKgEV_5jsbw
- Research and apply for scholarships related to engineering
- Research careers that are based around STEM, or engineering specifically.
- Research and summarize a news article on STEM
- Practice problems needed for other chapters in class
- Exit Interview
