Post-Assessment Answer Key

Draw the following steps:

Step 1: The bee flies to a flower.	Step 2: The bee lands on the flower to drink.	Step 3: The bee flies from one flower to another flower of the same kind.

Think about our Pollination Activity and answer the questions below. Check the word bank to help with spelling.

1. Our hands were the bees and bees are very important pollinators.
2. When we eat cheese puffs it was like the bees eating or drinking nectar.
3. The cheese puffs dust on our fingers was like the pollen on bees' legs.
4. When we went to the next flower, we pollinated that flower so it could grow and produce new flowers!

pollinators	pollen	pollinated	nectar	bees
