## Physics Problem Solving Rubric

| Criteria \& Rating | 5 | 4 | 3 | 2 | 1 |
| :---: | :---: | :---: | :---: | :---: | :---: |
| Strategic Approach (S) | Approach chosen is clearly shown, clearly written \& all elements are valid. | Valid approach with minor errors that do not disrupt understanding. | Valid approach with multiple errors that impede understanding. | Invalid approach that demonstrates little understanding of the problem. | Little or no understanding of how to approach the problem |
| Physics Concepts (P) | Appropriate concepts that are fully understood (symmetries, conserved quantities, etc.), clearly stated \& employed correctly. | Appropriate concepts that are mostly understood but employed with errors. | Appropriate concepts identified, but not employed or understood. | At least one concept identified but unable to demonstrate understanding. | Little or no understanding of physics concepts. |
| Mathematical Concepts (M) | Correct starting equations; all mathematical steps are clearly shown and they flow easily toward the correct answer. | Correct starting equations. All mathematical steps are clearly shown but minor errors yield wrong answers. OR <br> Correct starting equations with correct final result but the mathematical steps are hard to follow. | Correct starting equations. The mathematical steps are hard to follow and errors begin to impede application. | Can identify at least one equation, but unable to apply it/them. | Incorrect equations; demonstrates little or no understanding of mathematical concepts involved. |
| Answer (A) | 100\% correct answer analytically (IA) numerically <br> (IA) \& conceptually (IA). | Correct answer analytically (IA), but not numerically (IA). | Incorrect answer, but on the right path. | Unable to reach a correct answer on this path. | No answer. |

KEY: IA= If applicable; score of zero = incomplete assignment (NSW = no shown work or MS = missing assignment).
