

TITLE

Team Members Involved and Industrial Participants

Feel free to move the items around. Remember that all the points should be addressed in a clear and coherent fashion in your poster for credits.

Ask: Statement of Project Goal

Explain the needs and constraints for the project. Come up with a statement for your goal.

Imagine

Insert the model picture that you created.

Improvements

Discuss the improvements you made based on the testing and feedback.

Plan: Background and Prior Work

Present the rules for the game and the scoring guide. This is a good place to give a background story to impress your audience. You can explain your choices of material based on your plan.

Create

Insert a picture of your prototype field.

Future Work and Marketing Plan

Discuss the target audience for this sport. How would you market it? Can it be supportive to our environment in any way?

Fundamental Research

Show your results from the the "ball drop" experiment. Explain how you chose the right combination of ball-base using these results. You should present your graphs, which should include proper explanation.

Test Results

Give some responses that you received from the players. You can add experts' feedback on the game.

References and Acknowledgements

List the resources used for this project. Thank anybody who has helped you with the project (other than your group members).
