

*Optional Extension Activity*

# Examples of Bioplastic Toys and Silicone Molds

# Best Molds

*After doing this experiment:* The reaction scheme with more corn starch makes the best molded bioplastic toys.

The molds that work best are small in size and have little-to-no small side details such as arms, wings, antenna, etc.

This mold worked well

This mold worked well

This mold worked well

The smaller section  
of this mold worked well

This mold was too large  
and had some issues

In this mold, the feet came off
