“As the Coronavirus Comes to School, a Tough Choice: When to Close” Discussion Questions

Read the article, then answer the following questions in complete sentences.

1. What has happened in many schools when students or teachers bring COVID-19 into the building? Why?
2. At what point do some schools decide to close down? Give an example from the article.
3. What is the procedure at your school for when a student tests positive?
4. Why do positive cases in schools affect the broader community?
5. What issues or concerns are expressed in this article, and how do these issues compare with your own community? How can engineering be used to address these issues?"
