Example Observation T-Chart

The Health and Safety Measure I am observing is: Handwashing before lunch

- In your own words, describe the safety measure: Students at my school are required to wash their hands before lunch. There are six handwash stations in the cafeteria, students wait in line for their turn.
- Where did you make your observation? The cafeteria
- What day and time? 11/5/2020, 11:30-11:45 a.m.

| How is the safety measure working well? | Where is there room for problems? |
|-----------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------|-----------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------|
| <ul style="list-style-type: none">• Most students are waiting in line to wash their hands• Having six handwash stations allows students to socially distance while waiting in line• Students are standing on the spaces Marked on the floor | <ul style="list-style-type: none">• A few students are not washing their hands – they are skipping the line and faculty don't notice• Not every student is washing their hands for long enough |
