

Presentation Scoring Rubric

Instructions

Rate each group’s final one-slide summary project presentation, including how well it meets the presentation criteria.

Note: Each score gets 2 points added to it to calculate the grand total, so that the maximum score per team is 10.

	1 Failing	2 Developing	3 Proficient	4 Excellent	Total
Student preparation, knowledge and presentation skills	Students read slide text verbatim and do not present content clearly. Appears that little to no planning was done for the presentation.	Students read most information directly and are minimally prepared. Design information is presented only somewhat clearly.	Students read some information on slide but are mostly well-prepared. Design information is mostly clear.	Students do not read slides at all, but clearly communicate information. Presentation shows careful preparation.	
Slide content, organization and visual presentation	Slide communicates little or no design information. Messy and/or confusing to understand. Presentation not completed.	Slide communicates some design information (such as images and labels). Somewhat unclear. Could be better.	Slide communicates a moderate amount of design information (such as title, student names and images). Mostly neat and clear.	Slide neatly and fully communicates detailed design information (such as title, device name, student names, project description, images, labels, materials, etc.).
