Worksheet 2

Names of Group Me	mbers:
	-
	<u> </u>
Your Prediction:	
Consulting Team Ob	ojectives:
 Calculate 	electricity needs of new hospital.
generate	2 different proposals for what type of energy should be used to the projected increase in demand. Each proposal should be a short poster which shows:
•	Predicted electricity demand and rationale.
•	Amount of input energy required for the suggested resource (use $\%$ efficiency values for teacher resource).
•	Translation of what that means in volume or size
	For example:
3kW hr of solar inp	out = (how many) solar panels of (width) x (length)
•	The potential impact(s) of using the energy source.
