

Name _____

Construct and test roofs for different climates
worksheet:

Choose an environment to build your house and roof for:

1.Arctic

2.Desert

3.Tropics

List some characteristics that your house and roof need to have.

Draw your house and roof and label its parts and the materials you used to build it.

After testing your house, do you need to make any adjustments to the design?

If so, what will you do to fix it?
